PROFILE

Detail-oriented full stack Software Engineer with 3+ years of experience building modern, scalable applications with Angular, NestJS, and SwiftUI. Passionate about automation, code standards, and building seamless user experiences. Proven track record in delivering impactful features across web and mobile platforms, and integrating analytics at scale.

EXPERIENCE

Software Engineer I, Rocket Mortgage; Remote, MI — 2021-Present

Built and maintained Angular web applications in a monorepo using NX, focusing on performance, code sharing, and developer experience.

Developed robust Cypress E2E tests for mission-critical flows, including pixel validation through dynamically injected scripts and lead form flows.

Worked on AI applications and collaborated closely with product and design to prototype features and streamline workflows.

Maintained a high standard for code quality through pre-commit hooks, unit testing, and thorough code reviews.

IT Technician, Garber Automotive Group; Saginaw, MI — 2019–2021

Assisted in server maintenance, expansion, and deployment

Handled technical support tickets on and off headquarters

Responsible for imaging systems and creating scripts for the process

EDUCATION

SVSU, Saginaw, Michigan — Bachelor of Computer Science 3.73 GPA

SKILLS

Frontend: Angular, TypeScript, HTML/CSS, SwiftUI, Cypress

Backend: NestJS, Node.js, Express, REST APIs

DevOps: Git, NX Monorepo, Docker

Analytics: Amplitude, Adobe Experience Platform, Google Tag Manager
